Universal Design – These are smart products for the home that let you prepare for the future without intruding on your lifestyle today. Products marked with this symbol include lever handle faucets, comfort height toilets and showers pre-fit with backer board for the installation of grab bars at a later date.

DIAMOND™ Seal Technology – Delta's durable components and simple construction technology that allows faucets to last 10 times longer than the industry standard.

Touch2O®– Delta's technology that allows you to simply tap anywhere on the spout or handle of the faucet with your hand, wrist or forearm to start and stop the flow of water.

WaterSense – Products that meet the EPA's criteria for water efficiency and performance.

Water Efficient Products – Comply with the Green Building Standards Codes:
Toilets 1.28gpf or less • Lavatory Faucets 1.5gpm or less • Showerheads 2.0 gpm or less

H2Okinetic® – Delta's proprietary shower technology that sculpts the water into a unique wave pattern, creating the feeling of more water without using more water.

MultiChoice® Universal Valve – A Delta valve that, once installed, allows future shower function upgrades or style changes can easily be made without altering the plumbing behind the wall.

Flipstream Technology – Unique to the Kohler Flipside®, this sprayhead seamlessly switches between four distinct spray types by being flipped on its axis.

Right Temp Valves – Kohler's pressure-balancing technology that maintains water temperature within +/-3 degrees Fahrenheit.

PosiTemp® Valves – Moen's pressure-balancing control valve that help maintain water temperature in the shower.

Easyclean® – Moen shower heads featuring spray nodules that are rubberized, helping to prevent hard water deposit buildup.
